VRN Dynamic Pressure-Regulating Control Valves and Actuators

FEATURES

- Sizes from 1/2 to 3 in. with internal (female) NPT connections.
- Controls hot or chilled water with up to 50% glycol.
- Regulated flow rates available from 1 to 95 gpm.
- Differential pressure regulator for constant pressure drop across valve seat.
- Positive pressure, rolling diaphragm regulator design for flow control accuracy of ±5%.
- Equal percentage flow characteristic using patented flow control ball insert.
- Multiple maximum flow rates available per valve size.
- Patented ball seals for low operating torque.
- Nickel-chrome plated brass or stainless steel trim.
- Choice of factory-installed actuation using Honeywell N05/S05-series direct coupled actuators: Floating, Modulating (2-10 V), Spring Return Modulating/Floating.
- Spring return actuators field-configurable for normally open or normally closed fail-safe position.
- Removable, manual operating handle to control valve during installation or in an event of power failure.
- Upstream Test Port for venting or pressure gauge attachment.
- Three actuator orientations on the valve for cramped spaces.
- Integral snubber eliminates affect of system pressure fluctuations and entrapped air while improving flow performance.

APPLICATION

The VRN2 two-way dynamic pressure-regulating control valves maintain constant flow of hot or chilled water with glycol solutions up to 50% in closed-loop heating, ventilating, and air conditioning (HVAC Division 23) systems regardless of head pressure fluctuations above the minimum specified pressure drop. These valve assemblies can be used with Honeywell non-spring return or spring return direct coupled actuators (DCA) with minimum torque of 35 lb-in (4 Nm) on valve sizes up to 3 inches (DN80).

The built-in differential pressure regulator makes fluid flow through the valve independent of changes in supply pressure, eliminating “hunting” by the control system, even at low coil flow. The pressure regulator virtually eliminates cavitation in the valve, and decouples the control valve from the effects of piping components such as reducers and elbows.

Pressure independent control valves are sized to match design coil flow regardless of coil size. VRN2 valves eliminate the need to balance the system for proper flow, and allow chillers to be operated at design temperature differential for maximum efficiency at every load condition. When used in a system with variable speed pump drives, 3-way valves and coil bypass lines are not required. In new construction, VRN2 valves perform better than reverse return piping designs without the extra materials these systems need.

Pressure-independent control requires less flow, enabling use of smaller piping, pumps, and chillers.
SPECIFICATIONS

Valve Type: Dynamic Pressure Regulated Control Valve

Body Style: Two-way ball valve, straight-through flow, full port with patented flow control insert.

Pipe Size: 1/2 to 3 inches with female NPT pipe fittings.

Body Pressure Rating (maximum): 360 psi (2500 kPa) at 250°F (121 C).

Controlled Medium: Water or Glycol solutions up to 50%. Not suitable for combustible gases, oil or steam.

Medium Temperature Range: -22 to +250°F (-30 to +121 C).

Maximum Differential Pressure: See Table 1.

Close-off pressure: 100 psid

Flow Characteristics
Equal Percentage with flow control insert. See Fig. 8.

Materials
Body: Forged Brass (ASTM B283).

Flow Optimizer: laser-milled, glass-reinforced Noryl®
Trim (ball and stem): Nickel-chrome plated brass, or stainless steel.

Stem Seals: EPDM O-ring and Teflon™ bearings.

Ball Seals: Reinforced Teflon™ seals, with EPDM O-rings.

Regulator: Hydrogenated acrylonitrile-butadiene rubber rolling diaphragm in stainless steel housing.

Compatible Actuators
Minimum Torque Required: 35 lb-in. (4 Nm) up to 3 in. (≤DN80).
18 lb-in. (2 Nm) up to 3/4 in. (and 1 in. up to 9 gpm).

Non- spring return: ML6161, ML7161, MN6105*, MN7505*.

Spring return: MS6105, MS7505*, MS8105; MS6103, MS7503, MS8103 only at 1/2 in. or 3/4 in. (DN15 ~ DN 20).
* These actuators available factory-installed. See Table 3.

Approvals Standards
Actuators: See literature for the given actuator.

MVN Actuator

APPLICATION

MVN 3Nm (27 lb-in.) Control Valve Actuator is used with the VRN2 Dynamic pressure regulated control valves to control hot and chilled water with glycol solutions up to 50% in heating, ventilating, and air conditioning (HVAC) systems to provide two-position or modulating functions.

FEATURES

• Non-spring Return
• Floating and modulating
• Space saving, click-on installation – no tool required
• Extendable position indicator for easy commissioning
• Available with or without cable
• Compatible with control ball valves from 1/2 to 1-1/4 inches.
• Actuator can be mounted on the valve in any of four positions.

SPECIFICATIONS

Actuator Type: Valve
Rotational Stroke: 90° ±3°.
Fail Safe Mode: Non-spring return
Torque: 27 lb-in. (3 Nm).
External Auxiliary Switches Available: No
Environmental Rating: NEMA2
Frequency: 50 Hz; 60 Hz
Mounting: Click-on installation – no tool required
Noise Rating at 1m (Maximum): 35 dB(A) max at 1 m [50 dB (A) for MVN643].
Materials: Plenum rated plastic housing
Operating Humidity Range (% RH): 5 to 95% RH, non-condensing
Ambient Temperature Range: -4°F to 131°F (-20°C to 55°C)
Storage Temperature Range: -40°F to 176°F (-40°C to 80°C)
Weight:
Dimensions: See Fig. 4-6
Timing: 90 sec. for MVN613 and MVN713; 30 sec. for MVN643
Electrical Connections: Field wiring 18 to 20 AWG to screw terminals, located under the removable access cover.
Humidity Ratings: 5% to 95% RH noncondensing.
Design Life (at Rated Voltage):
60,000 cycles; 1 cycle = 0°…90°…0°
Cable Specification:
18 AWG, Plenum Rated, 300 V, 10 A, 3 ft. length from end of access cover.
Environmental Protection Ratings: IP40.
Approvals:
UL/cUL
UL60730

Non-Spring Return Direct Coupled Actuator

APPLICATION

This non-spring return direct-coupled damper actuator provides modulating and floating/2-position control for: air dampers, air handlers, ventilation flaps, louvers, and reliable control for air damper applications with up to 10 sq. ft./44 lb.-in. (5 Nm) and 20 sq. ft./88 lb.-in. (10 Nm) (seal-less damper blades; air friction-dependent).

FEATURES:

- Declutch for manual adjustment
- Adjustable mechanical end limits
- Access cover includes enclosed screw terminal strip (22 to 14 AWG) for electrical connections
- Models available with 3 foot 18 AWG color-coded cable
- Mountable in any orientation
- Function selection switch for selecting modulating or floating/2-position control

SPECIFICATIONS

Actuator Type: Damper; Valve
Rotational Stroke: 95° ±3 degrees
Fail Safe Mode: Non-spring return
Torque: 44 lb.-in. (5 Nm)
External Auxiliary Switches Available: Yes, SSW2-1M
Environmental Rating: NEMA2
Frequency: 50 Hz; 60 Hz
Manual operation: Declutch mechanism

Mounting: Direct coupled
Maximum Noise Rating, Driving (dBA @ 1m): 35
Rotation to Open: By switch
Rotational Stroke Adjustment: Dual Integral Adj. Stops (3 degree increments)
Compatible Damper Shafts: 1/4 to 1/2 in. square or 3/8 to 5/8 in. round (6 to 13 mm square or 8 to 16 mm round)
Shaft Adapter Type: U-bolt clamp
Supply Voltage: 24 Vac +20%, -15%, 24 Vdc
Materials: Plenum rated plastic housing
Ingress Protection Rating: IP54
Operating Humidity Range (% RH): 5 to 95% RH, non-condensing
Ambient Temperature Range: -5°F to +140°F (-20°C to +60°C)
Storage Temperature Range: -22°F to +176°F (-30°C to +80°C)
Weight: 1 lb (0.45 kg)
Includes: Mounting bracket, screws, shaft adapter, water-tight strain-relief cable fittings
Comments: Integral 1/2 in. NPSM conduit connection.
Approvals:
CE: 89/336/ECC, 73/23/EEC
C-Tick: N314
Underwriters Laboratories, Inc.: UL873, Plenum Rated
Canadian Underwriters Laboratories, Inc.: cUL C22.2 No. 24-93

VRN DYNAMIC PRESSURE-REGULATING CONTROL VALVES AND ACTUATORS

Spring Return Direct Coupled Actuator

APPLICATION

MS4105, MS7405, MS7505, and MS8105 Spring Return Direct Coupled Actuators (DCA) are used within heating, ventilating, and air-conditioning (HVAC) systems. They can drive a variety of quarter-turn, final control elements requiring spring return fail-safe operation.

FEATURES

• Brushless DC submotor with electronic stall protection on all models
• Self-centering shaft adaptor (shaft coupling) for wide range of shaft sizes
• Access cover includes enclosed screw terminal strip (22 to 14 AWG) for electrical connections.
• Models available with 3 foot 18 AWG color-coded cable
• Durable plastic housing with built-in mechanical end limits
• Spring return direction field selectable
• Shaft position indicator and scale
• UL (cUL) listed and CE compliant
• All models are plenum rated per UL873

SPECIFICATIONS

Actuator Type: Damper; Valve
Rotational Stroke: 95 ±3 degrees
Fail Safe Mode: Spring Return
Torque: 44 lb-in. (5 Nm)
Spring Return Torque: 44 lb-in. (5 Nm)
Spring Return Direction: By orientation
External Auxiliary Switches Available: No
Environmental Rating: NEMA2

Frequency: 50 Hz; 60 Hz
Mounting: Direct Coupled
Maximum Noise Rating, Holding (dBA @ 1m): 20 (no audible noise)
Maximum Noise Rating, Driving (dBA @ 1m): 50
Rotation to Open: By switch
Rotational Stroke Adjustment: Mechanically limited 5 degree increments
Compatible Damper Shafts: 1/4 to 1/2 in. square or 3/8 to 5/8 in. round (6 to 13 mm square or 9 to 16 mm round)
Shaft Adapter Type: Self-centering clamping
Materials: Plenum rated plastic housing
Supply Voltage: 24 Vac +20%, -15%, 24 Vdc
Operating Humidity Range (% RH): 5 to 95% RH, non-condensing
Ambient Temperature Range: -40°F to +149°F (-40°C to +65°C) for two-position actuators only
Storage Temperature Range: -40°F to +150°F (-40°C to +65°C)
Weight: 3.5 lb. (1.6 kg)
Includes: Mounting bracket, self-centering shaft adapter

Approvals:
CE: EMC 2004/108/EC; Certification Low Voltage Directive 2006/95/EC; IEC 60730-1 and Part 2-14
C-Tick: N314
Underwriters Laboratories, Inc.: UL873

Application Notes

**IMPORTANT**
Valve sizing is important for correct system operation. Undersized valves do not have sufficient capacity at maximum load. Oversized valves do not have sufficient authority over the load in modulating applications.

Oversized valves can cause excessive cycling and the seat and ball can be damaged because of the restricted opening.

Proper Use
These valves are only for use in cold, warm, and hot water systems. Not suitable for oil, combustible gases, or steam.

They are designed for a medium temperature range of from 35 to 250°F, at a maximum pressure of 360 psig VRN valves are to be operated with the appropriate Honeywell direct coupled actuators only.

Water should be properly filtered, treated and conditioned according to local conditions and the recommendations of the boiler or chiller manufacturers. The installation of a strainers and filters is recommended.

**IMPORTANT**
The presence of excessive iron oxide (red rust) in the system voids the valve warranty.

Required Operating Torque
Both Honeywell non-spring return MVN and spring return low torque direct coupled actuators can be utilized with the VRN2 valves. VR valves use a patented seat design that reduces the torque needed from the actuator.

TYPICAL SPECIFICATIONS

Valve Actuator
Direct coupled actuator shall accept analog modulating [(0)-2-10 Vdc], floating (tri-state), or two-position signal as indicated in the control sequence. Actuators shall be by Honeywell. Actuator shall provide minimum torque required for full valve shutoff position. Wiring terminals shall be provided for installation to control signal and power wiring.

Actuator shall be available with housing suitable for outdoor installation.

Accessories Identification tags shall be available for all valves.
