## Before You Begin

In order to begin using CirrusSense Cloud, you will need to have your router setup completed. You can refer to the manual included with your router to complete that process. You will also need:

- Your router's serial number, printed on the device's label.
- Your subscription code, provided to you when you purchased your subscription on your invoice or packing slip.

## Overview

The CirrusSense Cloud home page can be accessed through your computer's web browser at <http://cirrussensecloud.transducersdirect.com>.

## Setting up your account

From the CirrusSense Cloud home page, click the **Create an account** button to begin the registration process.

## Welcome to CirrusSense Cloud

If you already have an account, you can log in to view and configure your routers and sensors. You can monitor real time sensor data, setup alarms and notifications and more.

If you have just recieved your router and are connecting for the first time, please click the button to create an account now.
