Free Software Upgrades for WebStat®

Software Upgrade Notice

Honeywell periodically releases software upgrades for the WebStat controller. These are available free of charge.

Honeywell recommends that before the initial WebStat Controller installation the software be upgraded to the latest version available.

1. Download the latest software revision from www.customer.honeywell.com/webstat or www.buildingsforum.honeywell.com and save it to your hard drive.
2. Upload the upgrade file to your WebStat (See Software Update Package section in the user's guide, form 63-2658).

For technical support, please contact your local Honeywell WebStat distributor.

Free License Upgrade to Expand to 20 Thermostats and 10 Schedules

For devices with date codes before 0923, a free license upgrade is available to expand the WebStat controller from 12 to 20 thermostats and 5 to 10 schedules. WebStat controllers produced after this date will already have this capability.

1. Log into your WebStat and create a *.dist* backup file that is unique to your WebStat (See Backup/Restore Configuration section in user's guide, form 63-2658).
2. Locate the 19-digit Host ID on the WebStat device label (Qnx-NPM2-0000-XXXX-XXXX).
3. Send an e-mail to webstat@honeywell.com and include the backup file and Host ID. Use the following subject header: WebStat Upgrade – Qnx-NPM2-0000-XXXX-XXXX.
4. An e-mail will be sent back to you with a new *.license.dist* file attached.
5. Save the *.license.dist* file to your hard drive.
6. Upload the license files on your WebStat (See Software Update Package section in the user's guide, form 63-2658).

Printed in U.S.A. on recycled paper containing at least 10% post-consumer paper fibers.
