## On/Off Electric Spring Return Actuators

## Description

The M9210-Bxx-3 Series On/Off Actuators are direct-mount, spring return electric actuators that operate on AC 24 V power at $50 / 60 \mathrm{~Hz}$, DC 24 V power, AC 120 V power at 60 Hz , or AC 230 V power at $50 / 60 \mathrm{~Hz}$. These bidirectional actuators do not require a damper linkage, and are easily installed on dampers with $1 / 2$ to $3 / 4 \mathrm{in}$. or 12 to 19 mm round shafts, or $3 / 8$ and $1 / 2 \mathrm{in}$. or 10,12 , and 14 mm square shafts using the standard shaft clamp included with the actuator. An optional M9220-600 Jackshaft Coupler Kit is available for 3/4 to 1-1/16 in. or 19 to 27 mm round shafts, or $5 / 8$ and $3 / 4 \mathrm{in}$. or 16,18 , and 19 mm square shafts.
The M9210-Bxx-3 Series On/Off Electric Spring Return Actuators provide a running and spring return torque of $89 \mathrm{lb} \cdot \mathrm{in}(10 \mathrm{~N} \cdot \mathrm{~m})$. Integral line voltage auxiliary switches are available on the BxC models to indicate end-stop position, or to perform switching functions within the selected rotation range.
Refer to the M9210-Bxx-3 Series On/Off Electric Spring Return Actuators Product Bulletin (LIT-12011035) for important product application information.

## Features

- reversible mounting design simplifies installation and enables the actuator to spring return in either direction
- removable coupler adapts to a shorter damper shaft
- electronic stall detection throughout the entire rotation range extends the life of the actuator by deactivating the actuator motor when an overload condition is detected
- integral 48 in . (1.2 m) halogen-free cables with colored and numbered conductors simplify field wiring
- integral auxiliary switches (BxC models) provide one fixed and one adjustable switch point with line voltage capability
- NEMA 2 (IP54) rated aluminum enclosure protects the internal components of the actuator from dirt and moisture
- easy-to-use locking manual override with auto release and crank storage allows for manual positioning of the actuator hub
- integral connectors for $3 / 8$ in. flexible metal conduit simplify installation and field wiring

## Applications

The M9210-Bxx-3 Series On/Off Electric Spring Return Actuators are designed to position return air, exhaust air, or outside air dampers in Heating, Ventilating, and Air Conditioning (HVAC) systems. Refer to the manufacturer's information to properly size the damper and/or actuator.
