## CONTROL VALVES

## DESCRIPTION

The Honeywell ML6420, ML6421, ML6984, ML7420,
ML7421, and ML7984 Series are direct-mount, electric, non-spring return actuators designed for use on Honeywell V5011N/13N and VGF Series globe valves.
The ML6425 and ML7425 are direct-mount, electric spring return. The actuators can be ordered pre-assembled with a valve, or they may be easily installed in the field; separate linkages are not required.

## CONTROL VALVES

DIRECT-MOUNT GLOBE VALVE ACTUATORS

1 Allow 0.5 amps maximum for each device. Actuators and controller can share the same transformer providing proper phasing is observed, except as noted.
2 "T5" and "W" terminal are connected internally. Device is compatible with the three-wire control system.
3 Use configuration DIP switches to select device functions. See installation instructions.
