

Network Compatible Relays

• LonMark® • BACnet® • Ethernet

Made in the USA

Meets the "Buy American" provisions of Section 1605 of the American Recovery and Reinvestment Act of 2009 (ARRA).

Use These Devices When a More Expensive Multi-Output Controller is Too Much for the Job

- UL Listed
- BACnet® and LonWorks® protocol
- Analog input
- Digital output
- Digital input
- Thermistor inputs available
- On-board current sensors available
- Panel mount
- Enclosed versions
- NEMA 4X available

A LonMark® certified or a BACnet® compatible relay with a digital input can be used with an occupancy sensor in a room and turn on and off loads based on that status. This saves the cost of buying a LonMark® compatible or BACnet® compatible occupancy sensor by utilizing the digital input on our device.

LonMark® Devices

UL = UL Listed : UL916 Energy Management, USA & Canada

1 = Coil Side Relay Override (requires unit to be powered)

Precon® is a registered trademark of Kele and Associates.

Network Compatible Relay/Current Sensor Application

Save time, money, and messy wiring. LonMark® certified relay contains an internal current sensor for load status. Relay control and load status are easily accessible from the FT-10 Network.
